

10 Years in Ghaazee

It has been a great journey for us – the 10th year in Ghaazee and life has certainly done its job, teaching us great lessons, surprising us with amazing adventures.

Ghaazee School was built in the year 2007, and it certainly wasn't as advanced as it is today. We joined the school in 2008, when the areas surrounding us were seemingly deserted with the scorching sun burning our skins on our way to school every day.

However, as life went by, our spectacular school developed, as so did the area around it, with buildings of all sizes starting to loom with an excessive number of students swarming from the gates of Ghaazee. The high peaks going from just 604 students to an astounding 1765 in just 10 years.

Looking at the side of developments, one of the greatest phenomena of our school was built in 2017 – the turf ground which is said to be one of the largest turfs in the whole of Maldivian schools. Secondly, significant achievements from various competitions were attained by students for the school, and are presently increasing along with the Ghaazian Glory.

Glancing at the past, the school was vibrantly decorated several times to celebrate occasions and mark significant

ceremonies. Not to mention the educational quotes and motivational sayings that embellish the walls since long ago.

However, nothing ever remains the same, following the way of life. Ghaazee School initially progressed under our first principal Matheen Sir, but it is important to recognize and appreciate Hussain Saeed sir, Shaheel sir and Shathir sir for their tremendous contribution to the school. Presently, we are all progressing with the same purpose and intensity towards success and perfection under the heard authority of our fifth principal, Madam Mariyam Mohamed.

Having come this far wasn't easy; with us facing obstacles along the way, overcoming them with lessons of morality and wisdom.

So, up to this day, we have grown in an educative and interactive surrounding, facing challenges and celebrating great successes. Although our journey had both ups and downs we have always managed to pick ourselves up, doing justice to our school motto, "Progress with purpose".
